

Hydra-Screed HS3000

Changing The Way Contractors Around The World Shape Concrete

FLATWORK & SHAPES MADE EASY.

The Hydra-Screed HS3000 by Curb Roller Manufacturing is changing the way you shape concrete. It is able to shape not only traditional flatwork, but v-gutters, flumes, and so much more! The HS3000 is a two-operator machine that takes away most of the back-breaking labor, while also removing the need for multiple pours saving you time and money. Your crew can utilize less experienced workers while still maintaining a professional quality result.

LESS TIME

Increase production times with the Hydra-Screed HS3000. This machine allows you to do flatwork, flumes and more **at least 2X faster** than if you were to shape it by hand using boards.

MORE JOBS

The HS3000 has the ability to easily switch out any 6" OD pipe length up to 30' as well as custom drums made to any job specifications. Shaping in one pour in less time gives you the chance to fulfill more jobs.

MORE MONEY

More jobs + less time = more money. Thanks to the job increase potential, versatility, and the ability to maintain a consistent, higher quality shape, most companies will see an increase to their bottom line.

YOUR KNEES AND BACK WILL THANK YOU.

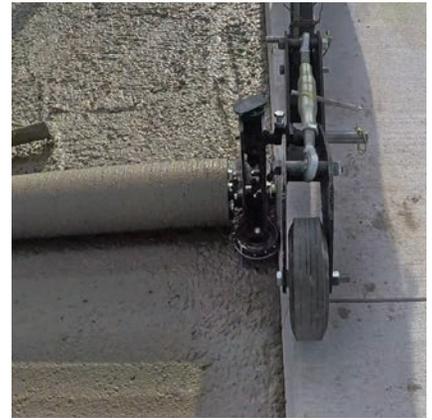

Due to its simple design, the Hydra-Screed HS3000 can be used on jobs of all sizes, including patch and repair work, making it perfect for applications such as parking lots or streets. Unlike a vibrating screed, it can be used for pervious paving and low slump concrete, as well as slope paving. The 6" OD steel tube can be placed right on existing concrete without the worry of wearing it out.

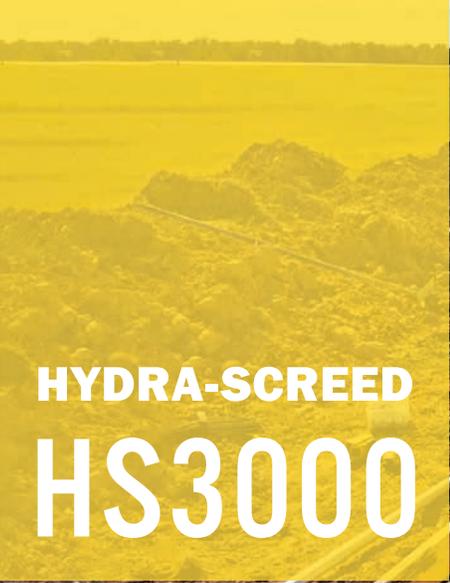

Powered by hydraulics, the HS3000 can tackle the toughest jobs with ease. It can connect to any available hydraulic power source: skid loader, mini excavator, power pack and more. Designed and built with the contractor in mind, it is easy to operate and requires minimal maintenance. And with removable drive ends, crews can quickly change from different lengths of pipe or profile shapes.

The HS3000 can also be fitted with a wide range of custom profiles made to fit your specific job needs. It can also be fitted with an adjustable guide ring allowing you to pour concrete on a side slope more efficiently, and the adjustable handle helps provide the preferred offset for the operator.

Whether it's a street, median, v-gutter, or flume, this machine can help cut down your production times while still maintaining a superior, high quality pour. For more information, videos, and the latest we have to offer, give us a call or visit our website!

The Hydra-Screed is backed by a 3 year warranty.

HYDRA-SCREED HS3000

MORE THAN JUST ROLLER SCREEDS.

Curb Roller Manufacturing also produces the Batt Screed and Hydra-Pack systems. Our Batt Screed utilizes a rechargeable 60 volt lithium ion battery for impressive power and run time, and eliminates exhaust fumes, cords, and hoses. The Hydra-Pack delivers an impressive two-way directional flow and is perfect for those job sites where your other hydraulic power sources won't fit.

Cut your work time in half with our top of the line concrete shaping products today!
